

Patient Safety Standards, Materials and Systems Guidelines

Recommended by the
New York State Office of Mental Health

With respect to NYS-OMH operated facilities, these Guidelines apply solely to new construction and major renovation projects. Existing facilities should use these Guidelines as a reference document whenever they make improvements.

Division 10 | Specialties

Toilet Accessories, Paper Towel Holders & Dispensers

General Notes

Best practice advocates the use of recessed toilet accessories.

Performance Criteria

Quality control of toilet accessories is important and often difficult to control. Samples should be requested as part of the submittal process.

Georgia-Pacific

www.gppro.com

59466A enMotion Semi-Recessed Paper Towel Dispenser

Semi-recessed automated touch-less paper towel dispenser.

Notes:

- Loopable flat top allows ligature.
- Serrated metal strip allows wedging opportunity for downward ligature and potential for weaponization.

Georgia-Pacific

www.gppro.com

56620 Combination Folded Paper Towel Dispenser

Combination C-fold/multi-fold paper towel dispenser.

Notes:

- Loopable flat top allows ligature.
- Slotted dispenser allows wedging opportunity for downward ligature.

Division 10 | Specialties

Toilet Accessories, Paper Towel Holders & Dispensers

General Notes

Best practice advocates the use of recessed toilet accessories.

Performance Criteria

Quality control of toilet accessories is important and often difficult to control. Samples should be requested as part of the submittal process.

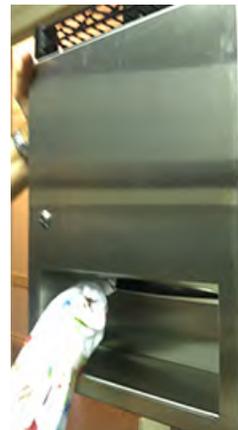

American Specialties, Inc.

www.americanspecialties.com

0457 Recessed Paper Towel Dispenser

22 gauge type 304 stainless steel with a satin finish.

Note: Slotted dispenser allows wedging opportunity for downward ligature.

Opsbox/Archer Manufacturing

www.vandalproof.org

Supreme Multi-Purpose Paper Towel Dispenser

Notes:

- Slot allow for wedging opportunities.
- Provides ligature points.

Division 10 | Specialties

Toilet Accessories, Hand Dryers

General Notes

Best practice advocates the use of recessed toilet accessories.

Performance Criteria

Quality control of toilet accessories is important and often difficult to control. Samples should be requested as part of the submittal process.

World Dryer

www.worlddryer.com

SLIMdri Hand Dryer

Surface-mounted ADA compliant hand dryer.

Caution: Vent area allows for looping opportunities.

American Specialties, Inc.

www.americanspecialties.com

0198MH SafeDri Recessed Mounted Sensor Hand Dryer

18 gauge type 304 stainless steel cover and hand dryer chamber over automatic hand dryer with infrared sensor. Air intake pulls from stud space or plenum.

Division 10 | Specialties

Toilet Accessories, Toilet Tissue Holders & Dispensers

General Notes

Best practice advocates the use of recessed toilet accessories.

Coordinate toilet tissue roll size with holder.

Performance Criteria

Quality control of toilet accessories is important and often difficult to control. Samples should be requested as part of the submittal process.

Installation Notes

Front mounted models should be installed with tamper-resistant fasteners. Back mounted models can only be installed on accessible chase walls.

Caution Notes

- Potential hazard with loose toilet tissue rolls which can be lodged in toilets.
- Potential infection control issue with loose toilet tissue rolls which can be easily dropped on the floor.
- Toilet tissue holders with spindles may allow a downward ligature by tying off to the spindles if they don't release when more than the acceptable amount of force is applied (greater than 11 lbs.).

American Specialties, Inc.

www.americanspecialties.com

110-13 Recessed Toilet Paper Roll Holder (Front Mounted)

14 gauge type 304 stainless steel with a satin finish.

Whitehall Manufacturing

www.whitehallmfg.com

1840-FA Recessed Toilet Paper Roll Holder (Front Mounted)

14 gauge type 304 stainless steel with a satin finish or white enamel finish.

Division 10 | Specialties

Toilet Accessories, Toilet Tissue Holders & Dispensers

General Notes

Best practice advocates the use of recessed toilet accessories.

Coordinate toilet tissue roll size with holder.

Performance Criteria

Quality control of toilet accessories is important and often difficult to control. Samples should be requested as part of the submittal process.

Installation Notes

Front mounted models should be installed with tamper-resistant fasteners. Back mounted models can only be installed on accessible chase walls.

Caution Notes

- Potential hazard with loose toilet tissue rolls which can be lodged in toilets.
- Potential infection control issue with loose toilet tissue rolls which can be easily dropped on the floor.
- Toilet tissue holders with spindles may allow a downward ligature by tying off to the spindles if they don't release when more than the acceptable amount of force is applied (greater than 11 lbs.).

Cascade Specialty Hardware

Toilet Accessories, Mirrors

General Notes

Only polycarbonate glazing is recommended for use in patient bathrooms.

Sabic Innovative Plastics

www.sabic.com/en

Royal Adhesives & Sealants

www.royaladhesives.com

Frameless Polycarbonate Wall-to-Wall Mirror

Lexan Dura-Mir, 0.25" (6 mm) polycarbonate. Install from wall-to-wall and from top of sink backsplash to ceiling, using adhesive recommended by polycarbonate manufacturer.

Note: Provide tamper-resistant sealant at mirror perimeter. Sealant joint shall not exceed 1/8". At joints that exceed 1/8", provide a metal or solid surface trim piece to conceal the edge of polycarbonate mirror.

Behavioral Safety Products

www.besafeprod.com

Ligature-Resistant Framed Stainless Steel Mirror

FM760 (18"x24") | FM770 (24"x36")
Polished stainless steel mirror with #8 finish. Powder coated (white) stainless steel frame.

Caution: Provide tamper-resistant sealant at full perimeter of frame.

Behavioral Safety Products

www.besafeprod.com

Ligature-Resistant Wood Framed Stainless Steel Mirror

FM160 (18"x24")
Polished stainless steel mirror with #8 finish. Wood frame available in birch, mahogany & walnut finish.

Caution: Provide tamper-resistant sealant at full perimeter of frame.

Division 10 | Specialties

Toilet Accessories, Mirrors

General Notes

Only polycarbonate glazing is recommended for use in patient bathrooms.

American Specialties, Inc.

www.americanspecialties.com

0600 Angle Frame Mirror

18 gauge type 304 stainless steel with satin finish. Concealed hanging bracket that locks onto top and bottom of frame by tamper-resistant screws.

Note: Ligature point can be established across the top of mirror due to squared edge and finish of stainless steel frame.

Oddball Industries

www.oddballindustries.com

SP-8 Mirror Guard

Note: Mirror guard has sharp edges and does not sit flush to profile of mirror.

Division 10 | Specialties

Window Treatments

General Notes

Users shall perform a risk assessment to determine their options for shower and privacy curtains.

Specify breathable fabric material for shower and privacy curtains.

Installation Notes

Recessed ceiling track shall run continuously between walls. Surface-mounted ceiling track shall run continuously between walls, or be installed with secure end caps. Fill all joints between sections of track with tamper-resistant sealant to reduce opportunities for ligation.

Caution Notes

- End caps can create opportunity for a wedge ligation.
- A looping point can be created in curtain tracks when an object, such as a penny, is inserted into the track.
- The breakaway weight for curtain carriers may exceed the limits at which self-harm can be induced. Carriers can be ganged together to increase the release weight.
- Track system may be weaponized if subjected to severe abuse and dismantled.

InPro Corporation

www.inprocorp.com

Clickeze Ultra Cubicle Track

Extruded aluminum track provides heavy-duty strength. For use with Clickeze accessories.

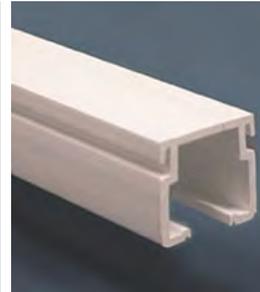

Clickeze Whisper Cubicle Track

Extruded PVC track allows for noise reduction during curtain movement. For use with Clickeze accessories.

Ultra Track

Whisper Track

Caution: Potential looping point at curtain tracks.

InPro Corporation

www.inprocorp.com

Clickeze Pop Out Carrier

Hook on carrier releases, allowing the curtain to fall, and disengages at approximately 10 lbs. of pressure. For use with both Clickeze Ultra and Whisper Curtain Tracks.

Division 10 | Specialties

Window Treatments

General Notes

Users shall perform a risk assessment to determine their options for shower and privacy curtains.

Specify breathable fabric material for shower and privacy curtains.

Flxsigns

Note: The Flxsign is highly susceptible to vandalism and can potentially be used as a weapon.

Division 10 | Specialties

Fire Extinguisher Cabinets

General Notes

Locate only in supervised areas.

Installation Notes

See NYS-OMH Guidelines for strategies to maintain wall assembly fire ratings at recessed cabinets.

Code Notes

NFPA 10 requires locking fire extinguisher cabinets to include a “means of emergency access”. Manufacturers interpret this in various ways, including:

- Full lock with staff assigned keys.
- Break-away latch/lock with resettable tongue.
- Break-away latch/lock with non-resettable tongue.

Carefully review non-resettable products before specifying, as actual damage may be caused to the latch/lock mechanism during emergency access. Repair may be simple or complex depending on the specific product.

Caution Notes

Fire extinguisher cabinets are tested primarily for abuse-resistance and may be loopable at cabinet/door joint.

Larsen’s Manufacturing Company

www.larsensmfg.com

Architectural Series 2712 Fire Extinguisher Cabinet

Stainless steel tub with a continuous hinge. Specify fully recessed cabinet with flat trim, or semi-recessed cabinet with rolled edge trim & door without handle. Specify mortise lock with keyed cylinder.

Wall Device Covers

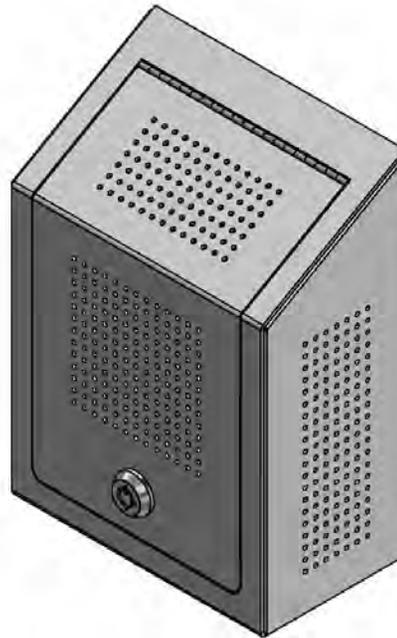

ARSCO Manufacturing Co.
www.arscomfg.com

**Anti-ligature Thermostat Cover
with Lock ACM0001-01A**

**Caution: Provide tamper-resistant sealant
at full perimeter of device.**

Division 12 | Furnishings

General Notes

Furniture with doors and drawers, such as wardrobes and dressers, will pose a potential ligature risk. Since there are no viable ligature-resistant solutions, it is highly recommended that doors and drawers are not provided for wardrobes, dressers, closet units, etc. unless their use is regulated by staff controlled locks. When considering if the use of wardrobes, dressers or closet units is desired or appropriate, best practice requires each new facility to complete a risk assessment for all spaces and furnishings. Patient privacy rights may also inform decisions about the need for specific furnishings.

Doors & Drawers Guidelines

- Provide locks for all doors and drawers, allowing staff to control access by at-risk patients when necessary.
- Provide doors with continuous hinges and hospital tips.
- Provide doors with recessed ligature-resistant finger pulls. If available, continuous integral finger pulls can also be provided.
- Provide drawers with recessed ligature-resistant finger pulls, stops, and locks.
- For high risk patients, consider the use of built-in closets with door top ligature sensors.

Wardrobe & Closet Unit Guidelines

- Recess wardrobes and closet units, or make continuous to underside of ceilings or soffits above.
- When it's not possible to make recessed units or make them continuous to underside of ceilings or soffits above, provide sloped tops.
- Provide collapsible coat hooks. Closet rods and j-bars are not acceptable.
- Requirements of the 2018 FGI Guidelines state: "Shelves for folded garments shall be used instead of arrangements for hanging garments."

Platform Bed Guidelines

- NYS-OMH has the following platform bed requirements:
- Beds must be platform type with flush side panels, headboards and footboards, with no overlapping lips between members.
- Platform beds shall be six-sided and have an enclosed bottom, or be five-sided and bolted to the floor.
- Provide solid wood or 3/4" plywood panels with veneer. Particleboard and plastic laminate are not acceptable.
- All wood members, both exposed and internal, shall be sealed with three layers of polyurethane.
- Internal construction shall consist of at least two intermediate supports. Acceptable support materials are wood and metal.
- All top and edge joints shall be sealed with tamper-resistant sealant.
- Provide no exposed fasteners, except when fastening bed to the floor.
- Glides and adjustable feet are not acceptable. Felt pads only.
- Exercise caution with platform beds that have restraints. These should be removed in all patient rooms unless one-on-one supervision is provided.
- Each facility must perform their own risk assessment to evaluate all products.

Manufacturers must be able to customize their bed construction to comply with all NYS-OMH platform bed requirements. Beds that do not comply will be rejected by NYS-OMH.

Division 21 | Fire Suppression

Division 21 | Fire Suppression Sprinklers

General Notes

Minimize removable parts.

Installation Notes

Specify no accessible parts that activate the sprinkler system when vandalized.

Tyco Fire Protection Products

www.tyco-fire.com

Raven Institutional Sprinklers

Pendant and horizontal sidewall heads. Standard, Quick Response & Extended Coverage. Stainless steel escutcheons available for installation in wet or damp areas.

Tyco Fire Protection Products

www.tyco-fire.com

Model TFP PH2 Sprinklers

Reliable Automatic Sprinkler Co., Inc.

www.reliablesprinkler.com

Model XL Quick Response Institutional Sprinkler

Cautions:

- A portion of the sprinkler head projects below the sprinkler head enclosure and is accessible to patients; tampering may activate sprinkler.
- Removable parts create a potential safety hazard for ingestion and weaponization.
- Break away weight is 50 lbs. and exceeds recommended.

Division 21 | Fire Suppression Sprinklers

General Notes

Minimize removable parts.

Installation Notes

Specify no accessible parts that activate the sprinkler system when vandalized.

Viking Group Inc.

www.vikinggroupinc.com

VK410 Pendant & VK412 Sidewall Institutional Flush Sprinklers

Note: The heat sensor projects below the sprinkler head enclosure and is accessible to patients. Damage to the heat sensor activates the system.

Division 22 | Plumbing

Division 22 | Plumbing

Lavatory Assemblies, General

General Notes

Lavatories in the following section are specified as systems. Individual components, used either independently of the system they are specified with, or combined with other systems, may not be ligature-resistant. Specifiers should take care to utilize products in concert to create systems that are safe for installation condition (e.g. in a niche as opposed to freestanding) and combinations of components that make a functional and safe system. These components include:

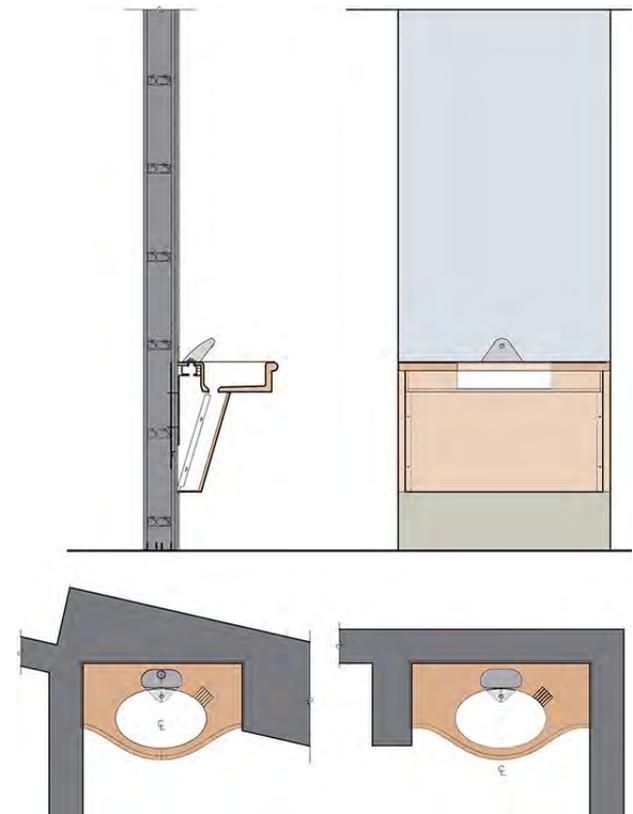

- Activators & Actuators
- Basins
- Countertops
- Faucets
- Fixtures
- Mirrors
- Niche Lavatories
- Pipe Enclosures

Ligature

Only fixed strainers should be used. Do not use pop-up drains. Care should be taken to specify ligature-resistant strainers.

Appearance

Facilities are encouraged to utilize lavatories and toilets made of materials other than stainless steel that support a therapeutic environment. If stainless steel fixtures are preferred by a facility, they should be specified with a powder coated finish.

Division 22 | Plumbing

Lavatory Assemblies

Code Notes

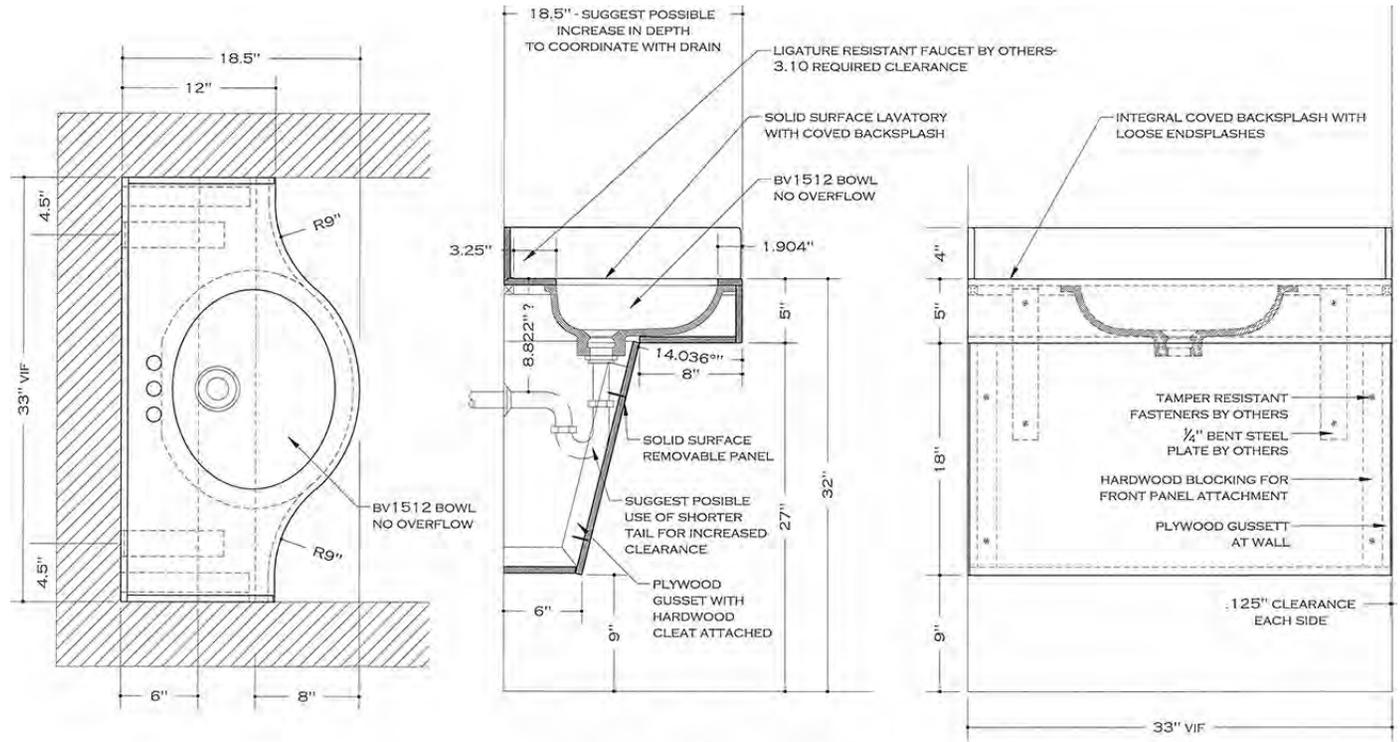

Provide ADA compliant handicapped accessible lavatory assembly configurations where required.

NYS-OMH Standard Lavatory Assembly

Custom Solid Surface Lavatory with Integral Sink Bowl & Pipe Enclosure

Niche mounted solid surface vanity counter with integral solid surface sink bowl and deck mounted ligature-resistant faucet. Removable integral solid surface pipe enclosure below mounted with tamper-resistant fasteners. Provide lavatory basin without overflow.

1 TYPICAL PATIENT LAV PLAN
0.3 SCALE: 1-1/2"=12"

2 TYPICAL PATIENT LAV SECTION
0.3 SCALE: 1-1/2"=12"

3 TYPICAL PATIENT LAV ELEVATION
0.3 SCALE: 1-1/2"=12"

Division 22 | Plumbing

Lavatory Assemblies

Code Notes
Provide ADA compliant handicapped accessible lavatory assembly configurations where required.

American Standard

www.americanstandard-us.com

Lucerne 0355.012

Wall hung, vitreous china sink.

Note: A pipe enclosure, complying with ANSI 117.1, is required with this wall hung sink to conceal exposed plumbing piping.

Caution: A difficult but possible ligature opportunity may exist with this product. A series of shoelaces tied together may be looped over the lavatory and pulled back toward the support wall under the pipe enclosure.

Behavioral Safety Products

www.besafeprod.com

Ligature-Resistant Solid Surface Lavatory #ET720

Shown with pipe enclosure, which comes standard, and deck-mounted dual-temp push-button faucet, sold separately.

Caution: A difficult but possible ligature opportunity exists with this product. A series of shoelaces tied together may be looped over the lavatory and pulled back toward the support wall under the pipe enclosure.

Division 22 | Plumbing

Lavatory Assemblies

Code Notes

Provide ADA compliant handicapped accessible lavatory assembly configurations where required.

Whitehall Manufacturing

www.whitehallmfg.com

WH3775 Solid Surface Wall-Hung Lavatory

Shown with fully accessible powder-coated stainless steel pipe enclosure, deck-mounted dual-temp push-button conical faucet.

Available without overflow hole.

Cautions:

- Provide tamper-resistant sealant at joint between underside of lavatory and top edge of pipe enclosure.
- A difficult but possible ligature opportunity may exist with this product. A series of shoelaces tied together may be looped over the lavatory and pulled back toward the support wall under the pipe enclosure.

Division 22 | Plumbing

Lavatory Basins

General Notes

Solid surface integral, countertop mounted and undermount lavatories are all acceptable when part of an assembly that is itself designed to be non-loopable.

Code Notes

Provide ADA compliant handicapped accessible lavatory assembly configurations where required.

American Standard

www.americanstandard-us.com

Rondalyn Countertop Sink

High gloss stain resistant vitreous china sink. Specify without overflow.

American Standard

www.americanstandard-us.com

Mezzo Semi-Countertop Sink

Self rimming fine fire clay semi-countertop sink. Specify without overflow.

Division 22 | Plumbing

Lavatory Pipe Enclosures

General Notes

Custom fabrications can be viable alternatives and, when properly detailed, may be preferable to pre-manufactured enclosures.

Installation Notes

Specify tamper-resistant fasteners.

IPS Corporation

www.ipscorp.com

Truebro Lav Shield Model #2018

Cautions:

- Pipe enclosure will conceal exposed plumbing piping, but is used with wall-mounted lavatory that poses looping opportunity.
- Careful scribing to underside of lavatory is required for a proper fit and sealant joint.
- Coordinate model of enclosure with model of wall-mounted lavatory.

Division 22 | Plumbing

Lavatory Faucets

General Notes

Faucets must be considered as part of the entire assembly.

Installation Notes

Specify projecting spouts only when the lavatory is positioned so that the lateral ligature hang is not possible (i.e. recessed in a niche).

Behavioral Safety Products

www.besafeprod.com

Ligature-Resistant Sensor Faucet #SF390

Deck mounted faucet is a single temperature faucet without controls. It may be specified as hard-wired or with battery power.

Best Care Ligature-Resistant Sensor Activated Faucet #WH3375-SO

Deck mounted faucet is a single temperature faucet without controls. Designed to retrofit onto existing 4" center-set lavatory decks.

Division 22 | Plumbing

Lavatory Faucets

General Notes

Faucets must be considered as part of the entire assembly.

Installation Notes

Specify projecting spouts only when the lavatory is positioned so that the lateral ligature hang is not possible (i.e. recessed in a niche).

Whitehall Manufacturing

www.whitehallmfg.com

Best Care Conical Ligature Resistant Faucets

Deck mounted conical faucet. Specify one of the following, with appropriate control valve assembly.

WH3376 - Single temperature with pneumatic pushbutton

WH3377 - Dual temperature with pneumatic pushbutton

WH3376-PPZ - Single temp with Piezo touch button

WH3377-PPZ - Dual temp with Piezo touch buttons.

Division 22 | Plumbing

Lavatory Faucets

General Notes

Faucets must be considered as part of the entire assembly.

Installation Notes

Specify projecting spouts only when the lavatory is positioned so that the lateral ligature hang is not possible (i.e. recessed in a niche).

Kohler Co.

www.kohler.com

K-922 Laminar Faucet

Note: This product's recess presents opportunity for wedge ligature.

Division 22 | Plumbing

Lavatory Grid Strainers

Installation Notes

Coordinate plumbing fitting and piping length associated with drains to ensure fit in pipe enclosures.

Oddball Industries

www.oddballindustries.com

SP-11-GDK Grid Drain Kit

Effective drainage is achieved only with the included air vent. Air introduction valve may not meet all local codes.

Caution: Although drainage holes are half the diameter as typical grid strainers, making threading of a thin ligature difficult, a paper clip can be woven through the perforations creating a tie off opportunity.

Typical Grid Strainer & Drain

Note: Typical grid strainers are rejected because ligature can be created by threading a ligature item through the perforations and be hung over the lavatory or vanity edge.

Division 22 | Plumbing

Toilets, General

General Notes

Toilets located in inpatient areas shall be specified as either 3.5 gallons per flush (gpf) blowout or 1.6 gpf siphon jet. They are equally effective in forcing matter through the trap and clearing the bowl.

Blowout Toilets

Blowout toilets are designed to clear the bowl with a high volume of water discharged from the bowl rim. Although these toilets are louder than siphon jet toilets, it has been noted that the higher volume of water allows matter to be forced further down the waste piping system. Please note that 3.5 gpf blowout toilets may not be permissible by code in all jurisdictions, and should be evaluated before selecting this option.

- Provides high velocity and jet action
- Noisy

Siphon Jet Toilets

Siphon jet toilets are designed with an incorporated water jet in the trapway that forces matter through the trap by creating suction in the bowl to pull the contents through as well. Siphon jets are manufactured with 1.1, 1.28 and 1.6 gpf and must be paired with the appropriate flush valve. Currently the 1.6 gpf models are recommended due to evaluation and OMH acceptance of performance.

- Economical water usage
- More commonly used due to quiet actions

Division 22 | Plumbing Toilets

General Notes

Due to the possibility of inappropriate behavior, 3.5 gpf blowout toilets and 1.6 gpf siphon jet toilets are recommended.

Installation Notes

The wall surface must be flush with the toilet to avoid gaps that can become ligature points.

Specify standard toilets with heavy duty carriers. Specify bariatric toilets with bariatric carriers. Coordinate with manufacturers for specific carrier model specifications.

Code Notes

3.5 gpf blowout toilets may not be permissible by code in all jurisdictions, and should be evaluated before selecting this option.

Caution Notes

- Floor mounted toilets must be provided with complete closure between the toilet and wall to reduce ligature opportunities.
- Toilet seats that are not integral with the bowl create ligature opportunities.

Ligature-Resistant Toilet #TN691

Floor mounted, back spud, 1.6 gpf siphon jet with integral seat or prepped for conventional toilet seat.

Kohler Co.

www.kohler.com

Anglesey K-4396 Toilet

Floor mounted, back spud, 1.6 gpf siphon jet with detachable seat.

Division 22 | Plumbing Toilets

General Notes

Due to the possibility of inappropriate behavior, 3.5 gpf blowout toilets and 1.6 gpf siphon jet toilets are recommended.

Installation Notes

The wall surface must be flush with the toilet to avoid gaps that can become ligature points.

Specify standard toilets with heavy duty carriers. Specify bariatric toilets with bariatric carriers. Coordinate with manufacturers for specific carrier model specifications.

Code Notes

3.5 gpf blowout toilets may not be permissible by code in all jurisdictions, and should be evaluated before selecting this option.

Caution Notes

- Floor mounted toilets must be provided with complete closure between the toilet and wall to reduce ligature opportunities.
- Toilet seats that are not integral with the bowl create ligature opportunities.

Intersan

www.aquadesignmfg.com

CWC150-AST Toilet CWC156-AST Toilet

Solid surface back-to-wall toilet with non-moving integral seat. 3.5 gpf valve available.

Whitehall Manufacturing

Toilet Flushometers

General Notes

Concealed flush valves with remote infrared sensor controls reduce looping ligature opportunities.

Stainless Steel cover plate shall be surface-mounted to a steel angle assembly with securement to wall framing. Tamper-resistant sealant shall be applied to the perimeter of the plate to reduce looping opportunities.

Flushometer sensor shall be secured to the back side of the stainless steel plate with tamper resistant fasteners, with the plate cut to allow infrared sensor and/or push button operation.

Coordinate size of plate and angle assembly with water closet and grab bars selected to ensure adequate clearance for removal of plate.

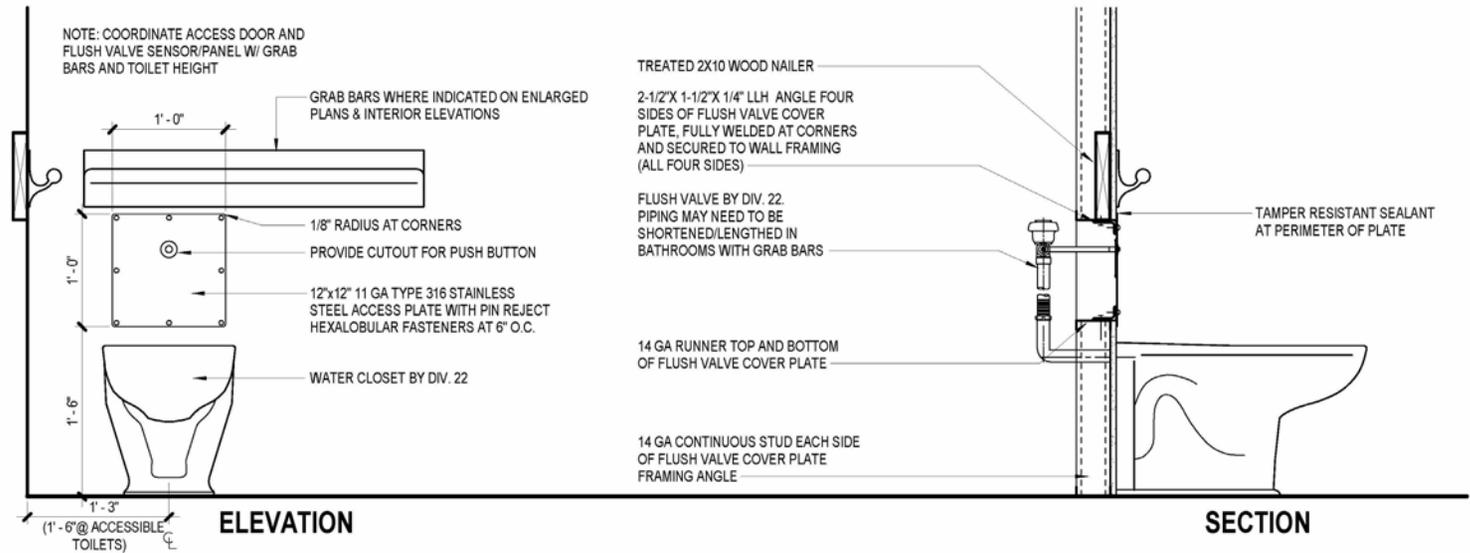

Verify flush valve requirements of remote flushometer sensor to ensure it can be mounted to the rear of the stainless steel cover plate to reduce ligature opportunities.

Division 23 | HVAC

HVAC, General

General Notes

Generally, ceiling mounted diffusers and grilles are more resistant to tampering, while wall-mounted elements provide more structural support for heavy and deep correction-grade assemblies.

Diffusers & Grilles

The selection of diffusers and grilles must be carefully considered in light of all relevant patient risk criteria, mechanical performance requirements, and the installed substrate. Louver and grille opening size and spacing is a critical consideration for structural performance, air flow and ligature resistance. The most secure and ligature-resistant assemblies are typically very heavy, requiring careful consideration for structural support and the sequence of construction.

The selection of radiator covers must be carefully considered with respect to all relevant patient risk criteria, mechanical performance requirements, and the installed substrate. Perforated radiator covers pose a particular risk as they can be looped by a thin shoelace or similar object. Because these enclosures are typically surface-mounted, careful consideration must be given to the installation conditions at these covers to prevent wedging/looping opportunities at the installed substrate. Tamper-resistant sealant should be utilized to close all gaps at perimeter of enclosure.

Diffusers and grilles should be securely mounted in place using tamper-resistant fasteners. Diffusers and grilles, and all accessible elements of the housing should be attached to permanently affixed concealed back angles that are part of the assembly, or to wall or ceiling framing elements. Because of the inherent variations in the manufacturing process, specifiers should procure samples of diffusers prior to specifying. Variations in finish along with manufacturing tolerances have caused unsafe installations in some products where other instances of the same line have achieved safe installations.

It should be noted that all ligature-resistant diffusers and grilles reduce air flow. Evaluation of this reduction shall be performed prior to incorporation/replacement of these diffusers and grilles.

Escape

Where escape is a primary risk criterion, diffusers and grilles should be reduced in size to the greatest extent possible. If diffusers and grilles are required to be large enough to allow passage, they should be securely mounted in place using welded joints and/or tamper-resistant fasteners. Diffusers and grilles, and all accessible elements of the housing should be attached to wall or ceiling framing elements and to the ductwork. Face plate construction should be thick enough to resist impact assaults and should not be removable, except with special tamper-resistant fastener tools. Passage restrictors should be permanently welded in the sleeve housing within the assemblies.

Ligature Resistance

Where ligature resistance is a primary risk criterion, diffusers and grilles should be specifically designed with closely spaced welded deep "S" and "Z" shaped vanes that prevent looping, or they should be protected by heavy gauge metal face plates with small, tightly spaced, perforated holes. Perforated grilles with 11 ga. (1/8" thick) face plates with holes no larger than 1/8" in diameter on 3/16" staggered centers have been tested and tend to resist looping, however all perforated grilles should be reviewed prior to specification/installation as manufacturing tolerances and fabrication errors may result in conditions that allow looping.

Perforated diffusers, grilles and radiator covers utilizing the industry standard of 3/16" hole on 9/32" spacing pose a particular risk as they can be easily looped by a thin shoelace or similar object. Because these devices are prevalent in existing inpatient environments, they are identified in this document as ACCEPTED in medium risk environments and noted with specific USE WITH CAUTION language. It should be noted that smaller holes and tighter spacing of holes, and heavier gauge metal plate are also available from several manufacturers as standard options. OMH will continue to perform additional testing on perforated grilles and diffusers and is researching alternative solutions. The risk of utilizing these devices shall be noted and evaluated by each facility.

Concealing Contraband

Where concealing contraband is a primary risk criterion, diffusers and grilles should be reduced in size to the greatest extent possible and securely mounted in place using tamper-resistant fasteners. Diffusers and grilles, and all accessible elements of the housing should be attached to wall or ceiling framing elements. Face plate construction should be thick enough to resist impact assaults and should not be removable, except with special tamper-resistant fastener tools.

Additional Information

CO2 sensors are not currently available in any ligature-resistant form and should only be used where accessible to patients in low or medium risk areas. CO2 sensors may be installed within ducts in high risk areas, but this will not qualify for the USGBC's LEED credits for high occupancy mechanically ventilated spaces.

Division 23 | HVAC

Thermostats

Diffusers & Grilles

General Notes

The products listed in this section have been tested for patient safety on the patient accessible side only. Any concealed features of the products are incidental, and should not be assumed as "Accepted."

Perforated grilles and radiator covers utilizing the industry standard of 3/16" holes on 9/32" spacing are easily looped and may pose a ligature risk. Perforation patterns of 1/8" at 3/16" centers have been shown to resist looping but do not entirely eliminate this risk. The specifier must carefully review these products to determine whether the inherent risk of perforated products is appropriate for use prior to specification.

Installation Notes

Careful detailing of diffusers and grilles with substrate is required.

Some of the diffusers included in this document have several options for mounting, installation, and overall configuration. Several of the mounting options may limit access resulting in inaccessible ductwork for cleaning and maintenance. The specifier must carefully review these conditions with owner's representative and maintenance personnel prior to specification and installation.

Performance Criteria

The configuration of ligature-resistant grilles may offer significantly less free area than similarly-sized standard commercial grilles. Engineers shall size grilles appropriately to achieve the required free area.

Finish

The metal finish of perforated and bladed diffusers affects their ligature-resistance. Specify a powder-coated paint finish.

Careful detailing of diffusers and grilles with substrate is required.

Some of the diffusers included in this document have several options for mounting, installation, and overall configuration. Several of the mounting options may limit access resulting in inaccessible ductwork for cleaning and maintenance. The specifier must carefully review these conditions with owner's representative and maintenance personnel prior to specification and installation.

Performance Criteria

The configuration of ligature-resistant grilles may offer significantly less free area than similarly-sized standard commercial grilles. Engineers shall size grilles appropriately to achieve the required free area.

Finish

The metal finish of perforated and bladed grilles affects their ligature-resistance. Specify a powder-coated paint finish.

Kees, Inc.
www.kees.com

SEG-9SP3 Security Grille

14 ga steel perforated face with 3/16" diameter holes on 9/32" staggered centers. Two part polyurethane finish. White.

Caution: Perforated diffusers, grilles and radiator covers pose a particular risk as they can be easily looped by a thin shoelace or similar object.

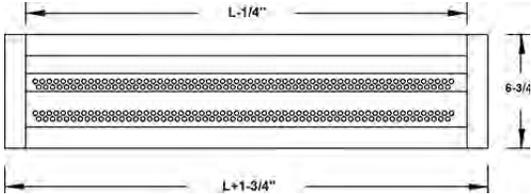

Kees, Inc.
www.kees.com

SEG-9LS3VH Security Diffuser

10 ga steel perforated face with 3/16" diameter holes on 9/32" staggered centers. Two part polyurethane finish. White.

Caution: Perforated diffusers, grilles and radiator covers pose a particular risk as they can be easily looped by a thin shoelace or similar object.

Division 23 | HVAC

Diffusers & Grilles

General Notes

The products listed in this section have been tested for patient safety on the patient accessible side only. Any concealed features of the products are incidental, and should not be assumed as "Accepted."

Perforated grilles and radiator covers utilizing the industry standard of 3/16" holes on 9/32" spacing are easily looped and may pose a ligature risk. Perforation patterns of 1/8" at 3/16" centers have been shown to resist looping but do not entirely eliminate this risk. The specifier must carefully review these products to determine whether the inherent risk of perforated products is appropriate for use prior to specification.

Installation Notes

Careful detailing of diffusers and grilles with substrate is required.

Some of the diffusers included in this document have several options for mounting, installation, and overall configuration. Several of the mounting options may limit access resulting in inaccessible ductwork for cleaning and maintenance. The specifier must carefully review these conditions with owner's representative and maintenance personnel prior to specification and installation.

Performance Criteria

The configuration of ligature-resistant grilles may offer significantly less free area than similarly-sized standard commercial grilles. Engineers shall size grilles appropriately to achieve the required free area.

Finish

The metal finish of perforated and bladed grilles affects their ligature-resistance. Specify a powder-coated paint finish.

Division 26 | Electrical

Division 26 | Electrical

Receptacles & Cover Plates, General

General Notes

Provide hospital grade, tamper-resistant receptacles with arc fault and ground fault interruption in all patient accessible areas of all psychiatric hospitals. When it is not feasible to provide dual protection at the receptacle location, provide dual protection circuit breakers for all circuits with devices in patient accessible areas. See descriptions below for details.

In new construction or substantial renovations, where arc fault and ground fault interruption are both provided at the receptacle, provide electrical cover plates that are either thermoplastic nylon or metal. In minor renovation projects, where providing arc fault and ground fault interruption are beyond the scope of the project, provide only metal electrical cover plates. In all cases, fasten cover plates to receptacle with tamper-resistant fasteners that are accepted in the NYS-OMH Patient Safety Standards. Two fasteners are recommended, though not required, for all cover plates.

Hospital Grade Receptacles

Hospital grade receptacles are on emergency circuits and receive back-up power from a generator. Review applicable codes to identify areas Hospital Grade Receptacles are required.

Tamper-resistant Receptacles

Tamper-resistant receptacles feature built in safety shutters that block foreign objects from being inserted into the receptacle. Shutters remain closed if an object is inserted into one side of the receptacle. The shutters open only when a two bladed or grounded plug is inserted. Excessive tampering may compromise the receptacle.

Provide tamper-resistant receptacles with arc fault and ground fault interruption in all patient accessible areas of all psychiatric hospitals.

AFCI (Arc Fault Circuit Interrupter) Protection

AFCI protection guards against damage or fires which can result from arcing and sparking that can arise from deteriorated wires, poor connections and breaches in wire insulation. Arc fault self-harm can be induced by holding two insulated conductors (e.g. paper clips while holding them in flexible plastic or rubber as an insulator) and bending them close enough together to get an electrical current to arc between them, perhaps in an effort to create a cigarette lighter or start a fire.

GFCI (Ground Fault Circuit Interrupter) Protection

GFCI protection guards against ground faults, and are an effective means of preventing electrical shocks. Ground fault self-harm can be induced by grounding oneself (e.g. to the floor) while holding one conductor (i.e., paper clips) in the hot side of the receptacle, causing the electrical current to flow through oneself to the ground.

Division 26 | Electrical

Receptacles & GFCI/AFCI Circuit Breakers

General Notes

See comments on previous general notes page.

Provide tamper-resistant receptacles with arc fault and ground fault interruption in all patient accessible areas of all psychiatric hospitals.

Provide dual protection circuit breakers for all circuits with devices in patient accessible areas when it is not feasible to provide dual protection at the receptacle location.

Circuit breakers are located within secure electrical panels outside of the patient environment. They are included in this document because they enhance the patient safety of the built environment.

Division 26 | Electrical Wall Plates

General Notes

Thermoplastic nylon wall plates are recommended. They are more flexible than thermoset (urea) products and have a shinier, glossy finish. Molded thermoplastic nylon wall plates also perform for maximum resistance to impact, abrasion, fading and discoloration. Nylon is resistant to stresses associated with high abuse applications.

Installation Notes

Nylon is pliable so it should be installed in a bed of tamper resistant sealant.

Legrand

Caution: Intended for use in OMH facilities only when other alternatives are considered unsuitable due to excessive tampering by patients.

Division 26 | Electrical Occupancy Sensors

General Notes

Infrared detection is not suitable for bathrooms with partitions and rooms with cubicles. Ultrasonic detection is recommended for these locations.

Ceiling mounted sensors are recommended in lieu of wall-mounted sensors.

Caution Notes

Concealed sensors function properly above acoustic and gypsum board ceilings however, may be compromised when installed above metal ceilings.

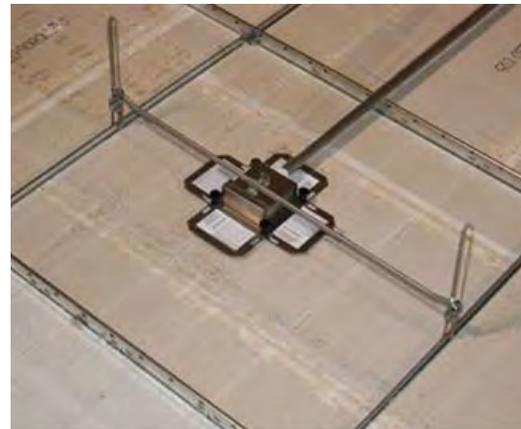

Concealite Architectural Products

www.concealite.com

SpaceStation Series 2000 Occupancy Lighting Control System

SpaceStation operates at 120 or 277 VAC and utilizes super high frequency technology to control lighting based on occupancy. It sends out electromagnetic waves that bounce off nearby surfaces, and uses the Doppler principle to analyze changes in the return waves to detect motion in the area.

Detects movement within a room when installed above suspended ceilings, gypsum board and decorative wood ceilings. Occupancy sensor is completely concealed from view, and installation requires no visible ceiling penetration.

Watt Stopper

www.wattstopper.com

CI-200 Series Passive Infrared Ceiling Sensor

Note: Plastic dome covering sensor is not tamper-resistant and a wedge point can be established. Mounting escutcheon is not mechanically fastened and a wedge point can be established behind it if it is not installed flush to substrate.

Division 26 | Electrical

Light Fixtures, General

Performance Criteria

Provide lighting that meets the following criteria:

- Lighting: High efficiency, maintaining visual performance where applicable. Provide dimmable ballasts as required.
- Lamps: NYS-OMH standard is LED due to its high efficiency, performance, reliability, and cost effectiveness.
- Diffuser|Lens: Provide 1/8" thick minimum polycarbonate prismatic or translucent lens. Lens frame requires enough edge bite in order to retain the lens during maximum deflection.
- Housing: Durable and indestructible.
- Exposed Fasteners: To be tamper-resistant with finish to match housing.
- Maintenance: Specify fixtures with standard replacement parts, lamps and ballasts. Consider the minimum number of security fasteners required for patient safety.
- Approvals: Underwriters Laboratories (UL) and others as applicable.

Installation Notes

Install light fixtures flush with substrate. It is critical to ensure there are no gaps. Any remaining gaps shall be filled with tamper-resistant sealant.

Coordinate lighting fixture specifications with new/existing ceiling substrate prior to ordering. When installing light fixtures into a medium or high risk ceiling system, it is imperative that the installation of the light fixture does not diminish the patient safety of the ceiling system as a whole. Therefore, it is recommend to mechanically fasten light fixtures to the ceiling system in order to maintain the appropriate level of patient safety at the ceiling plane.

The following properties identified in the product descriptions of each fixture included in this section were present in the sample tested for patient safety:

- Size
- Required specification options
- Mounting configuration
- Inner lens thickness
- Outer lens thickness
- Housing
- Finish

Altering any of these properties may impact patient safety and therefore warrants additional testing of a sample fixture for patient safety evaluation.

Additional Notes

Verify photometrics of light fixtures with polycarbonate lenses during the project design.

The Office of Mental Health Lighting Standards Handbook is intended for use by Plant Superintendents and Design Consultants as a reference guide when replacing light fixtures. The Handbook details which energy saving options may be best for each application. It is important to also reference the Office of Mental Health Patient Safety Standard Guidelines when replacing or specifying light fixtures in patient areas. OMH reinforces the importance of patient safety before energy efficiency in their facilities in all patient areas.

Only those models listed have been tested. Models with different options in any category warrant additional testing of a sample fixture.

Amico Lighting Solutions

www.amico.com

Behavioral Solar Duo Med Multifunction LED

Size: 6"x48"
 Required Options: VRA (vandal resistant; 0.118" clear polycarbonate)
 Mounting: lay-in grid ceilings
 Outer Lens: 0.118" clear polycarbonate
 Housing: 20 gauge cold rolled steel
 Finish: white urethane powder coat finish, hospital grade

Amico Lighting Solutions

www.amico.com

Behavioral Solar Eclipse Multifunction LED

Size: 2'x2', 2'x4'
 Required Options: VRA (vandal resistant; 0.118" clear polycarbonate)
 Mounting: lay-in grid ceilings
 Outer Lens: 0.118" clear polycarbonate
 Housing: 20 gauge cold rolled steel
 Finish: white urethane powder coat finish, hospital grade

Cooper Lighting Solutions

www.cooperlighting.com

FSP HS Shallow Plenum

Size: 2'x4'
Required Options: HS (high security)
Mounting: lay-in grid ceilings
Outer Lens: 0.25" clear polycarbonate
Housing: aluminum & steel (above ceiling)

Installation Note: Apply tamper-resistant sealant around perimeter, between ceiling opening and fixture edge.

Paco Lighting

www.pacolighting.com

MRGA1 Behavioral Center Lens Recessed LED, 1x4, 2x2, 2x4

Size: 1'x4', 2'x2', 2'x4'
Mounting: lay-in grid ceilings
Outer Lens: 0.250" clear polycarbonate
Housing: 16 gauge cold rolled steel with continuously welded end plates; 14 gauge die formed door frame with tamper resistant fasteners
Finish: white antimicrobial paint

FLD6B HS LED Downlight

Size: 6" aperture
Required Options: vandal resistant enclosed bottom trim ring; HS (high security)
Mounting: drywall ceiling
Inner Lens: 0.06" frosted polycarbonate
Outer Lens: 0.125" clear polycarbonate
Housing: cast aluminum
Finish: matte white

H.E. Williams

www.hew.com

V6DR 6" Vandal-Resistant Downlight - Round

Size: 6"
Required Options: flush lens trim type (L); 1/2" standard flange type (OF)
Mounting: drywall and metal security ceiling
Inner Lens: polycarbonate
Housing: textured white trim flange (MWT)
Finish: clear semi-specular powder coat

Philips Chloride

www.lightingproducts.philips.com

CE-11500 SC Series Exit Light

Diffuser|Lens: No lens provided.

Housing: Two piece die cast aluminum with chevron cutouts.

Finish: Epoxy based powder coat or brushed aluminum.

Note: Cutout letters/chevrons allow access to interior of fixture.

Philips Chloride

www.lightingproducts.philips.com

CE-11500 SC Series Recessed Exit Light

Diffuser|Lens: Polycarbonate/Lens.

Housing: Two-piece die cast aluminum with 18 gauge recessed back box and vandal resistant lens.

Finish: Epoxy based powder coat or brushed aluminum.

Note: Lens does not sit flush inside recessed back box for tight and secure fit.

Division 27 | Communications

Wireless Routers

General Notes

Wireless routers shall be mounted above the ceiling systems in medium and high risk areas when possible. It should be noted that functionality may be compromised when routers are installed above metal ceilings.

Wireless routers can be mounted below the ceiling systems in low risk areas.

Oberon

www.oberoninc.com

Model 1041-WA

11" single piece recessed ceiling Wi-Fi access point mount/white plastic dome

Division 27 | Communications

Clocks

Installation Notes

It is recommended to specify recessed wall clocks with polycarbonate lenses.

Sapling Synchronized Clock Systems

www.sapling-inc.com

Flush Mount Housing Kit for an Analog 12" Square Clock (V1.0) (A-FLUSH-MNT-12S-KIT-1)

Frame for analog clocks within a synchronization system with built-in web interface, data received from preprogrammed third party NTP servers for reliability and redundancy, built-in self-diagnostics and email alerts for various functions, and ability for users to view, monitor, and send various commands to all IP clocks in the system. Provides automatic daylight saving time changes, and 12 or 24 hour display.

Compatible with SAL, SAP, SAW, and SAM Series clocks, providing different synchronization technologies.

Sapling Synchronized Clock Systems

www.sapling-inc.com

Digital Flush Mounted Polycarbonate Frame (V1.0) (D-XXX-FIL-XXX-F-KIT-1)

Frame for digital clocks within a synchronization system with built-in web interface, data received from preprogrammed third party NTP servers for reliability and redundancy, built-in self-diagnostics and email alerts for various functions, and ability for users to view, monitor, and send various commands to all IP clocks in the system.

Compatible with SBP and SBD Series clocks, providing different synchronization technologies.

Division 27 | Communications

Clocks

Installation Notes

It is recommended to specify recessed wall clocks with polycarbonate lenses.

Primex Wireless

www.primexwireless.com

XR Series Transmitters

Transmitters wirelessly synchronize time for analog and digital clocks, timers, and other time receivers throughout the facility. Specify GPS.

Division 28 | Electronic Safety & Security

Fire Alarm Components, General

General Notes

At this time, NYS-OMH is not aware of any patient-safe fire alarm components.

Device covers are susceptible to abuse and can be looped/weaponized. Careful consideration is required when specifying and locating devices associated with fire alarm and other electronic safety and security systems. It is therefore extremely important to locate these items in such a way to prevent patient access and interaction in high and medium risk areas.

Fire alarm notification devices are required to be ceiling mounted in high risk areas.

It is recommended that fire alarm notification devices be ceiling mounted in medium risk areas.
